PROFILE

M.Sc. student in Artificial Intelligence and Data Science at Hochschule Furtwangen University with over two years of industry experience in backend development, data science and data analysis. Work so far includes REST APIs, machine learning models, data pipelines and BI dashboards for tracking, warehousing and delivery operations.

EDUCATION

M.Sc. Artificial Intelligence and Data Science for Digital Business Management 03/2026 – Present
Hochschule Furtwangen University, Furtwangen im Schwarzwald, Germany | Grade: 1.8

B.E. Computer Science and Engineering 07/2019 – 08/2023
Visvesvaraya Technological University (Bapuji Institute of Engineering and Technology), Davangere, India | CGPA: 7.65

PROJECTS

ID Document Digitization (MIDV-500) | Master's Project, Hochschule Furtwangen University 05/2026 – 06/2026

- Built an end-to-end ID document pipeline: U-Net with a ResNet34 backbone for document segmentation, followed by perspective rectification to straighten the detected documents.
- Extracted text from the rectified documents with PaddleOCR and ran the full pipeline on the complete MIDV-500 dataset.

FreightIQ: Freight Price Prediction | Master's Project, Hochschule Furtwangen University 04/2026 – 06/2026

- Built a data enrichment pipeline for 386K+ shipment records: geocoded locations (LocationIQ, Photon, OSRM), resolved destination states, corrected distances and standardized city and state names.
- Benchmarked 5 regression models using MAE, RMSE, R^2 and MAPE; selected XGBoost and tuned its hyperparameters to reduce prediction error.
- Presented the business impact in a Looker Studio dashboard.

WORK EXPERIENCE

Associate Backend Developer | Caliper Business Solutions, Bangalore, India 08/2024 – 01/2026

- Built and deployed CRUD APIs for a real-time tracking system and tested them with Postman before release.
- Led database operations to resolve critical client issues while keeping data consistent.
- Used Git for version control and Docker for containerization throughout the development lifecycle.

Associate Data Scientist | Caliper Business Solutions, Bangalore, India 10/2023 – 08/2024

- Built and deployed predictive machine learning models for business use cases, including System Suggested Price (GitHub).
- Implemented numerical models to optimize warehouse stock levels, reducing excess inventory.
- Designed clustering algorithms for vehicle assignment in the EDD Planner (GitHub), streamlining delivery operations.
- Built Looker dashboards for operational and business metrics and wrote MySQL queries for recurring client MIS reports.

Freelance Web Developer | D-Techno, SavoringMinds, Bangalore, India 05/2025 – 08/2025

- savoringminds.in: developed and deployed a full-stack website for a mental health startup, with responsive design and secure contact forms (GitHub).
- dtechno.in: built a performance-optimized website with WordPress and custom CSS for a tech solutions provider (GitHub).

Data Analyst Intern | Caliper Business Solutions, Bangalore, India 08/2023 – 10/2023

- Queried and extracted data with Holistics and MySQL; prepared MIS reports and interactive Looker dashboards.

TECHNICAL SKILLS

- **Programming:** Python, SQL
- **Machine Learning:** Regression, XGBoost, Clustering, Numerical Optimization, Hyperparameter Tuning, Model Evaluation (MAE, RMSE, R^2, MAPE)
- **Computer Vision and OCR:** U-Net, ResNet34, Image Segmentation, PaddleOCR
- **Data Pipelines:** Data Cleaning, Data Enrichment, Geocoding (LocationIQ, Photon, OSRM), MIS Reporting
- **Backend:** Flask, Django, REST APIs, CRUD APIs, Postman, Git, Docker, VS Code
- **Databases and Tools:** MySQL, MongoDB (Compass), Looker Studio, Microsoft Excel
